Summary

Lead Product Engineer with 18+ years of experience building scalable Java-based applications using microservices and distributed systems. Proven track record of delivering high-impact products across BFSI, Aerospace, and Hi-Tech domains. Strong product mindset with hands-on expertise in backend development, system design, and end-to-end ownership .

Core Skills

Java (8/17/21), Spring Boot (2.x/3.x), Microservices, REST APIs, JPA/Hibernate, Kafka, Distributed Systems, System Design, Azure, Docker, CI/CD, SQL, PL/SQL, React (16+)

Professional Experience

MBB Labs Pvt Ltd	Lead Product Engineer	Dec 2021 - Present
Capgemini India Pvt Ltd	Manager	Jul 2016 - Dec 2021
Tata Consultancy Services (TCS)	Assistant Consultant	Feb 2011 - Jul 2016
Oracle Financial Services Software (OFSS)	Consultant	Sep 2007 - Feb 2011
NDS Services Pay TV Technology Pvt Ltd	Software Engineer	Apr 2005 - Sep 2007

Education

Master of Computer Applications (MCA)	Nehru Memorial College, Tiruchirappalli	2001
Bachelor of Science (B.Sc.)	Nehru Memorial College, Tiruchirappalli	1997

Additional Skills

Cloud Platforms	Azure, AWS
Databases	Oracle, PostgreSQL, MongoDB
Practices	Agile (SAFe)
AI/ML	NLP, RAG-based systems, LangChain, LangGraph
Domains	BFSI, Hi-Tech, Aerospace

Projects

Common Components Platform (SCRIPT) - Banking Analytics

Lead Product Engineer | MBB Labs | Bengaluru | Dec 2021 – Present

Part of the core platform team building reusable components and frameworks used across 20+ banking products.

Designed, developed, tested, and delivered reusable platform components including:

- Authentication, Authorization, and Unified Access Management (UAM) systems enabling secure access across multiple products
- Dynamic UI Form Builder (Questionnaire) with data-driven UI and behaviour configuration
- Component and portfolio definition and execution frameworks for real-time data analytics
- Event-driven ESB frameworks enabling reusable integrations across multiple product teams
- Template designer and reporting framework supporting configurable and multi-dimensional analytics
- Enabled reuse of platform components across 20+ applications, improving development speed and consistency

Change Process & Airbus Offer

Technical Architect | Capgemini | Bengaluru, Toulouse | Jul 2016 - Dec 2021

Worked on Scaled Agile Release Train (CP/AO) within Airbus end-to-end PLM portfolio.

- Designed and delivered application components (ACC, ACMM) supporting complex PLM workflows and business processes
- Designed and built REST APIs enabling integration across distributed enterprise systems
- Collaborated with system architects to define, review, and finalize solution architecture
- Ensured adherence to coding standards and SAFe practices within the Agile Release Train

Digital Transformation

Technical Lead | TCS | Bengaluru, London | Feb 2011 - Jul 2016

Led AI-driven transformation initiatives for PwC datacentre operations supporting a 200+ member helpdesk team.

- Designed and built a workforce management solution for workload forecasting and optimal allocation of helpdesk engineers
- Developed an NLP-based virtual assistant using **Stanford CoreNLP** to automate FAQ-based service desk requests, with UI built using **Sencha Ext JS**
- Built diagnostic tools and scripts to proactively detect system faults and operational issues
- Developed self-healing automation tools to resolve recurring incidents and reduce manual intervention

OFSA Funds Transfer Pricing

Technical Lead | Oracle Financial Services Software | Bengaluru | Sep 2007 - Feb 2011

Contributed to Oracle FSGBU product engineering for the OFSAA FTP module, enabling matched-rate transfer pricing, risk-adjusted profitability analysis, and net interest margin measurement for banking institutions.

- Designed FTP processes and batch execution workflows end-to-end
- Built Monte Carlo engine integration for option cost calculations
- Developed ledger migration for aggregated transfer pricing results
- Implemented backend and UI using Java, Struts, Oracle SQL
- Supported development, implementation, and production across banking clients

Java EPG for DirecTV

Software Engineer | NDS Limited | Bengaluru | Apr 2005 - Sep 2007

Developed UI features and resolved defects for DirecTV EPG system

- Implemented and optimized EPG screens, rendering and event processing logic
- Improved performance of screen rendering and event processing
- Built in-container test harness framework (Droid) for distributed teams

Achievements & Contributions

[Sencha Ext JS MVP](#) (2019 - Present) – Honoured for community contributions.

[Agaram Foundation](#) – Supporting & mentoring students.
